MILK PRODUCTION, DISPOSITION AND INCOME, 1979

Milk production during 1979 totaled 124 billion pounds, 2 percent more than the 1978 output of 122 billion pounds. The 1979 production was 3 percent below the record 127 billion pounds produced in 1964. Output per cow in 1979 was a record 11,471 pounds, up 253 pounds from 1978. The annual average number of cows was 10.8 million head, 1 percent below the 1978 average, and continues the downward trend.

Cash receipts from marketings of milk and cream in 1979 were at a record \$14.7 billion--16 percent above the previous high of \$12.7 billion in 1978. An increase in marketings coupled with higher prices accounted for the \$2 billion increase from the previous year. Producer returns from combined marketings averaged \$12.11 per hundredweight, up \$1.44 from 1978. Producers marketed 121 billion pounds--milk equivalent--compared with 119 billion pounds in 1978. Marketings include whole milk and producer-separated cream sold to plants and dealers, as well as milk sold directly to consumers.

An estimated 2.49 billion pounds of milk were used where produced--7 percent less than a year earlier. Nearly sixty percent was fed to calves with the remainder consumed in producers' households as fluid milk, cream, and butter.

1979 MILK PRICES AND FAT TEST

Milk prices and fat test for all States for 1979, including revisions where necessary, are shown on pages 3, 8, 10, and 11.
